## November, 2019 K.C.R.C.I. Newsletter

### 2019 Update

- We are preparing to ship 20 machines to India soon that will enable us to serve more hospitals and patients in need of dialysis. We are now serving four hospitals and have some new locations that we are hoping to work with soon. Our primary focus has been on India.

- Dr. Marian Tetteh-Korbe in Accra, Ghana contacted us to furnish machines to Ghana Police Hospital as they have a great need there. We are preparing to ship a container of 15 refurbished machines from the U.S. to Ghana, this month. The machines will be upgraded to standards in Ghana.

### Chronic Kidney Disease Facts:

- Chronic Kidney Disease (CKD) affects about 10% of the world's population.
- Due to lack of accurate national data collection, the incidence of CKD in India is not clear, but studies estimate that the number of new patients diagnosed with End Stage Kidney Disease (ESKD) who are started on dialysis or transplantation is over 100,000 a year.
- The most common causes of kidney disease in India are Diabetes and Hypertension.

### How You Can Help

Join us in our quest to provide much needed help in India and other parts of the world. You will not only be helping to provide a better quality of life to patients needing dialysis, you will also be saving lives.

1. You may send a check to K.C.R.C.I., 1617 Williams Drive, Suite 210, Murfreesboro, TN 37129.
2. You may visit our website ([kcrci.org](http://kcrci.org)) and donate using Paypal.
